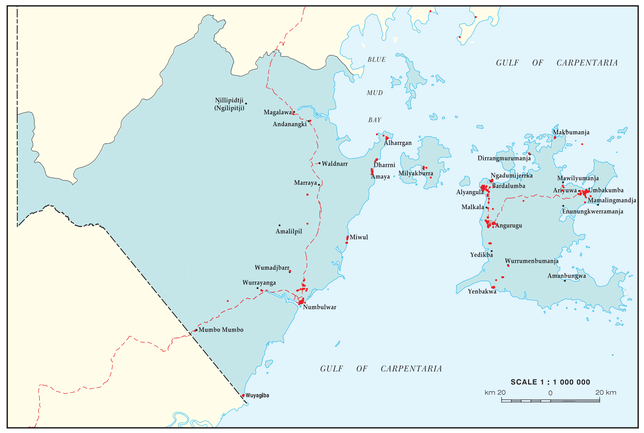
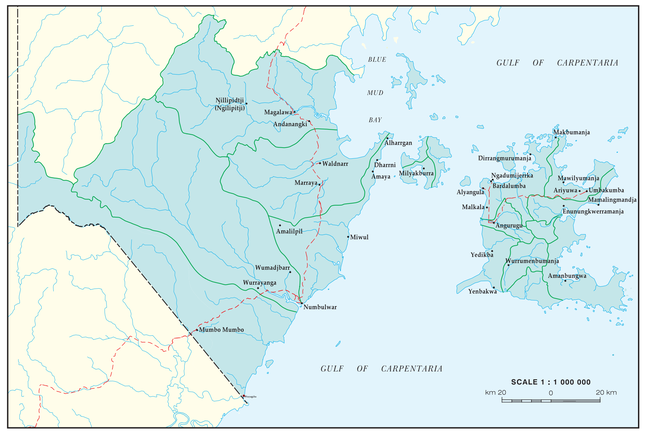
BORE DENSITY MAP



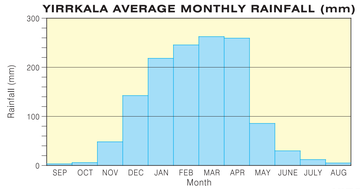
SURFACE WATER FEATURES: Warraŋulpuy gapu

- eyabijaba akungwa ..... Surface water divide
- ..... River with a flow of more than 100 L/s at the end of the Dry season
- ..... River with a flow of between 10 and 100 L/s at the end of the Dry season
- ..... River with permanent waterholes and flows of up to 10 l/s at the end of the Dry season
- ..... River which is dry at the end of the Dry season
- ..... Lake, perennial
- ..... Lake, intermittent
- emedirra akungwa ..... Waterhole
- awurukwa ..... Swamp or marsh
- anuma ..... Mangrove
- ..... Subject to inundation

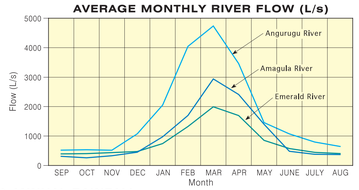
SURFACE WATER CATCHMENT MAP



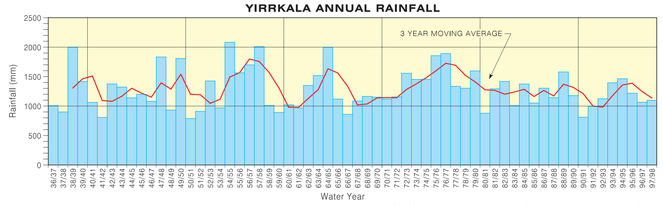
YIRRKALA AVERAGE MONTHLY RAINFALL (mm)



AVERAGE MONTHLY RIVER FLOW (L/s)



YIRRKALA ANNUAL RAINFALL



MINIMUM ANNUAL WATER TABLE LEVEL

MINIMUM ANNUAL RIVER FLOW

Note:
- Water flows recorded from gauging stations at:
  Angurugu: GS9290006
  Emerald: GS9290211
  Amagula: GS9290005
- 75/76 means the water year September 1975 to August 1976.
- predicted values based on correlation with Angurugu River are shown as a broken line.

GENERAL FEATURES

- •Numbulwar — homeland (outstation) langwa ekirra ..... Homeland name
- ANINDILYAKWA — angaŋya langwa ekirra ..... Country name
- •Almarlangij ..... Place name
- ..... ATSIC Region boundary
- ..... Stream gauging station - open, closed
- GS 9290211 ..... Stream gauging station number
- yelyukwa langwa station ..... Rainfall station - open, closed
- R 9290120 ..... Rainfall station number operated by Water Resources Division
- DR 014506 ..... Rainfall station number operated by Bureau of Meteorology
- murungwena ..... Rainforest (may indicate groundwater discharge)
- mamurukwa ..... Road
- mamalika dlraba langwa ..... Vehicle track
- akababurringa langwa ajirlngka ..... Landing ground - open
- ..... Landing ground - disused
