Dear Rachael Pepper and respected members of the panel thank you for your time and energy that you are putting into this vital work. Your approach to be truly independent and make an effort to engage with the community has given us a sense of hope. Though the prospect of having the Jemmina pipeline being given a green light feels like this enquiry is being undermined. Here are a w links that I based my presentation on or have found relevant and informative.

As you are a Science based inquiry this talk is valuable a great presentation by a engineer that has deep knowledge of Shale fracking process, a little less industry bias as the explanation given in the public meeting.

LEAKING FRACK WELLS ARE A 100% CERTAINTY

www.youtube.com

Instead of reinventing the wheel it could save time and be a valuable resource to see what the European Comission into Fracking came up with.

<file:///C:/Users/jason/Documents/fracking%20folder/european%20commission%20fracking%20study.pdf>

I have tried to find the video of the family in Queensland that got sick living near fracking my wife mother and friends remember seeing the video but we have been unable to fing it it is a constant problem that relevant usfull information disappears off the internet. Where evidence is found of an incident environmentally or health wise the people involved are compensated but silenced signing contracts not to talk about it. Here is some other stuff I found.

The industry no matter how well regulated can not stop wells leaking and they can not stop the water being polluted and the impact and risks increase exponentially with time and the number of wells drilled. the treatment for the unimaginable amount of polluted water is an unsolved problem of the industry. Please help The territory I love this place it could have such a bright future for centuries to come. If I can assist you in any way please let me know how Thank you from Jason
