Subject: Stand fast on the moratorium on fracking
Date: Thursday, 12 October 2017 8:02:16 AM

Dear NT government

Stand by your moratorium on fracking. Thanks for protecting our land and water from corporate exploitation. Don't allow the federal government to bully you into reversing good policies for perverse outcomes. It only takes one 'event' – one occasion on which a 'fracture stimulation' goes wrong – to poison an entire basin's water. We have no need for the gas, therefore there is no justifiable reason to take the risk. Solar energy carries no such risk of water contamination and can deliver just as many jobs.

Keep saying no to unconventional gas and oil.

Regards

Kirsten Duncan
