Subject: Submission

My submission, as a patriotic and proud Australian, is simply NO! NO! NO! Our beautiful country does NOT need to be destroyed by these money hungry businesses who don't care about anything other than money. The future of our country is at risk here and also the health and well being of Northern Territorians and others.

Please do what your conscious tells you is the ethical and right thing to do when voting on this horrendous decision. If you have children and/or grandchildren - think what your decisions means for their future - good health in a land that provides them with clean, fresh drinking water that is not contaminated through the effects of fracking; a land that is not effected by earthquakes that seem to be a side effect of fracking (look at the record of these in the Dakotas for starters; and a land that respects the rights of citizens to tell big business NO and a land where the politicians and other decision makers actually listen and do what the people they represent want them to do and not what big business wants.

Thanks you and my hope is that the members of the inquiry board are both ethical and moral in their decision making and take a stand for their employees - the peoples of Australia.
