Subject: No Fracking in the NT

Dear Justice Pepper and the panel,

In conclusion to your Final Draft Report I and many Australians are calling for a Total Ban for Fracking. We don't accept the risks Fracking poses to the Territory. 120 Recommendations from the NT Fracking Inquiry Report and 115 risks is simply not worth the risk. In light of Origin and the NT Government submitting false information to the inquiry they can not be trusted to protect our water and our land and our culture. *In April 2017, Origin Energy provided the NT Fracking Inquiry with a diagram which removed all reference to the casing failure at the Amungee NW-1H horizontally fracked well in the Beetaloo Basin. Origin Energy erased evidence of a frack well casing deformation on it's NT test well in a submission to the Fracking Inquiry.* A full investigation of Origin's conduct, and how this vital information bypassed the NT Government and the Fracking Inquiry expert panel is needed.

Your sincerely

Alisha Mercer
