Fracking Inquiry

McWhirter, Sue (ERA) From: Thursday, 17 August 2017 2:11 PM Sent: fracking inquiry To: No Go Zone Subject:

I have just read on social media that if this god forsaken fracking takes place in the NT (we are buggered if it does)...our wildlife are in great danger....as if they aren't already. How can this government justify the amount of traffic on our remote roads that will endanger more of our wildlife.

From what I have read the traffic will be constant, day and night....so what happens to out nocturnal wildlife that use these roads for food, water.

How about thinking of other things more important than greed for once.....the way things are going with our wildlife...there aint going to be too much left....

Cheers

Sue
