Subject: No to Fracking

Hi enquiry, thanks for the opportunity to have input on this issue. As a born and bred territorian I just can't support this form of mining. At its heart the process of fracking damages the earth and puts at risk our water supply and that jeopardises the very lifestyle that I enjoy and that I want to pass on to my children. And for what? No amount of money is going to be enough to replace what we have in the NT if this goes south. Sorry I am out.
