**To:** fracking inquiry  
**Subject:** Inadequate reasons for fracking in the NT

**Follow Up Flag:** Follow up  
**Flag Status:** Completed

Current demands from the Federal government for the states - and the NT - to allow fracking in order to service local Australian demand are cynical in the extreme, as it is policy and market failures to ensure that there is enough gas for local needs that has led to the current energy shortages. The NT Fracking Inquiry must not allow this pressure to influence their findings.

Yours,

Jennifer McFarland
