

Dear sir.madam, the technology described as fracking should be banned totally in australia. We have adequate supplies available by conventional means. Do not risk our future on short term greed which will only benefit a few! New ways of supplying energy are emerging exponentially . In the near future we will look back and see this technology as cheap.toxic and unsustainable. I implore you not to inflict this abomination upon us. hoping you can see past the smoke and mirrors on this one.Kind regards,Tony Parsons
