

# **CERTIFICATE OF ANALYSIS**

Work Order : ES1619100

Client : ORIGIN ENERGY RESOURCES LTD

Contact :

Address : GPO BOX 2320

ADELAIDE SOUTH AUSTRALIA, AUSTRALIA 5001

Telephone

Project : Beetaloo Groundwater Monitoring

Order number : 16231417 C-O-C number : ALS001 915

Sampler : ----

Site : Beetaloo

Quote number : --
No. of samples received : 3

No. of samples analysed : 3

Page : 1 of 4

Laboratory : Environmental Division Sydney

Contact : EB ProjectManager

Address : 277-289 Woodpark Road Smithfield NSW Australia 2164

Telephone

Date Samples Received : 31-Aug-2016 09:45

Date Analysis Commenced : 31-Aug-2016

Issue Date : 12-Sep-2016 15:25

This report supersedes any previous report(s) with this reference. Results apply to the sample(s) as submitted. This document shall not be reproduced, except in full.

This Certificate of Analysis contains the following information:

- General Comments
- Analytical Results

Additional information pertinent to this report will be found in the following separate attachments: Quality Control Report, QA/QC Compliance Assessment to assist with Quality Review and Sample Receipt Notification.

### Signatories

This document has been electronically signed by the authorized signatories below. Electronic signing is carried out in compliance with procedures specified in 21 CFR Part 11.

Signatories Position Accreditation Category

Inorganic Chemist Sydney Inorganics, Smithfield, NSW Senior Spectroscopist Sydney Inorganics, Smithfield, NSW Metals Teamleader Radionuclides, Fyshwick, ACT Inorganics Coordinator Sydney Inorganics, Smithfield, NSW

Project Beetaloo Groundwater Monitoring

#### **General Comments**

The analytical procedures used by the Environmental Division have been developed from established internationally recognized procedures such as those published by the USEPA, APHA, AS and NEPM. In house developed procedures are employed in the absence of documented standards or by client request.

Where moisture determination has been performed, results are reported on a dry weight basis.

Where a reported less than (<) result is higher than the LOR, this may be due to primary sample extract/digestate dilution and/or insufficient sample for analysis

Where the LOR of a reported result differs from standard LOR, this may be due to high moisture content, insufficient sample (reduced weight employed) or matrix interference.

When sampling time information is not provided by the client, sampling dates are shown without a time component. In these instances, the time component has been assumed by the laboratory for processing purposes.

Where a result is required to meet compliance limits the associated uncertainty must be considered. Refer to the ALS Contact for details.

Key: CAS Number = CAS registry number from database maintained by Chemical Abstracts Services. The Chemical Abstracts Service is a division of the American Chemical Society.

LOR = Limit of reporting

- ^ = This result is computed from individual analyte detections at or above the level of reporting
- ø = ALS is not NATA accredited for these tests.
- ~ = Indicates an estimated value.
- Gross Alpha and Beta Activity analyses are performed by ALS Fyshwick (NATA Accreditation number 992).
- TDS by method EA-015 may bias high for samples 1,2,3 due to the presence of fine particulate matter, which may pass through the prescribed GF/C paper.
- Ionic Balance out of acceptable limits due to analytes not quantified in this report.
- MBAS is calculated as LAS, molecular weight 342
- EA016: Calculated TDS is determined from Electrical conductivity using a conversion factor of 0.65.
- EA250 LSC: LOR for Gross Alpha and Beta raised due to high solid content

Project : Beetaloo Groundwater Monitoring

## Analytical Results

EA005P: pH by PC Titrator

EA010P: Conductivity by PC Titrator Electrical Conductivity @ 25°C

Total Dissolved Solids @180°C

Total Dissolved Solids (Calc.)

Gross beta activity - 40K

Total Alkalinity as CaCO3

EA065: Total Hardness as CaCO3
Total Hardness as CaCO3

ED037P: Alkalinity by PC Titrator
Hydroxide Alkalinity as CaCO3

Carbonate Alkalinity as CaCO3

Sulfate as SO4 - Turbidimetric

ED093F: Dissolved Major Cations

EG020F: Dissolved Metals by ICP-MS

ED045G: Chloride by Discrete Analyser

Bicarbonate Alkalinity as CaCO3

EA250: Gross Alpha and Beta Activity

EA015: Total Dissolved Solids dried at 180 ± 5 °C

ED041G: Sulfate (Turbidimetric) as SO4 2- by DA

EA016: Calculated TDS (from Electrical Conductivity)

Sub-Matrix: WATER (Matrix: WATER)
